

Certified Facility Locksmith®

This 5-day hands-on course provides you with a comprehensive knowledge of Locksmithing to handle large facilities with multiple buildings. This is done by providing a fundamental base that builds upon existing foundations to become a professional locksmith.

Bringing your Locksmithing services in-house will save you time, money and provide better security while ensuring compliance with new National Fire Door Assembly Inspections and Life Safety Inspections regarding egress doors.

The training in this course will provide your staff with the skills necessary to become a more efficient and competent technician who can service, install, troubleshoot and masterkey institutional, commercial and traditional key lock systems and door openings.

This program gives your facility the opportunity to have professionally trained Locksmiths on your property daily to resolve security issues and provides a first line defense that improves your facility management. This program is designed for the beginner as well as the experienced locksmith. We take you from the first steps in Locksmithing to advance by using a proven well-structured program that has been successful for over 16 years.

Hands-on evaluations, course instruction and study materials are designed to help attendees to get the most of this course. Students must pass the exam to complete the course and become a Certified Facility Locksmith®
